

Capabilities

SecurityStudio (or **S2**) is a mission-driven information/cyber security solutions company dedicated to simplifying information security management and compliance.

The **S2** platform is the premier risk and digital safety assessment tool to assess and manage information/cyber security risks for individuals (consumers and employees/personnel), the organizations they work for (public and private sector), and their vendors.

Differentiators

- ✓ Unique combination of information security software tools
- ✓ Standards based
- ✓ Low cost
- ✓ Easily scales from small to large organizations
- ✓ Common security risk score (S2Score) across all modules
- ✓ Fundamental, low-cost information security risk assessment
- ✓ Vendor information security risk management with automated workflow and risk data aggregation
- ✓ Information security risk assessment for personnel, to identify cyber security training opportunities
- ✓ Innovatively designed, intuitive, simple to use interface
- ✓ Software as a service (SaaS) with simple implementation

Past Performance

Thousands of organizations in every industry use the SecurityStudio software platform. S2 users represent city governments, states, counties, K-12 schools, colleges and universities, banks, credit unions, hospitals, healthcare systems, manufacturers, energy, law firms, pharmaceuticals, construction, non-profits, retail, consultants, printing and more.

Two examples:

- ✓ State of Minnesota
- ✓ State of North Dakota

**INFORMATION/CYBER SECURITY
SAAS SOFTWARE TOOLS FOR YOUR
ORGANIZATION, YOUR EMPLOYEES
AND YOUR VENDORS.**

CORE COMPETENCIES

S2ORG

ASSESS YOUR ORGANIZATION

Analyze the security standards in place at your company for a clear picture of the vulnerabilities, gaps and deficiencies in your security program.

S2VENDOR

ASSESS YOUR VENDORS

Easily identify all of your third-party vendors, assess their security practices to expose any weak links that need to be remediated.

S2TEAM

ASSESS YOUR EMPLOYEES

Understand your employees' personal technology habits to identify the most impactful security training.
